WORK EXPERIENCE

Web Developer Personal Work

Web Developer Personal Work
March 2020 to Present

Web developing is an interesting job, I've taught myself to build a static website that used html5 and css. My next step is to make a dynamic website, and learn back end skills. To be a full-stack developer is my goal.

Android Developer Team Project

Android Developer Team Project - New York, NY
January 2020 to Present

I'm currently taking the course of Android Studio with Java at Lehman College, I'm passionate love this course that is full of challenging. After 3 weeks day and night focusing on analysis, programming, and debugging, I've accomplished most part of this Calorie Calculator app as our term project:
